

Plastic Collated Round Head Nails

These 21-degree round head nails are collated with a plastic strip for use in pneumatic nail guns. The plastic collation ensures consistent feeding and reduces jamming during high-volume nailing applications.

Product Overview

Professional Grade Collated Nails

These 21-degree round head nails are engineered for high-performance pneumatic nail gun applications. Featuring a plastic strip collation, they ensure consistent feeding and significantly reduce jamming during high-volume construction tasks. Designed for a secure and flush finish, they are the ideal choice for framing, sheathing, and subflooring projects.

Technical Specifications

Collation Angle	21 degrees
Head Type	Round Head
Collation Material	Plastic Strip

Application & Compatibility

Recommended Applications	Framing, Sheathing, Subflooring, General Construction
Tool Compatibility	Pneumatic Nail Guns

Key Features

Performance Benefits

- Consistent feeding mechanism
- Reduced jamming in high-volume use
- Secure and flush finish
