

Plastic Container Blow Molding Machine

This blow molding machine is a robust solution for producing plastic containers and hollow products. It features a high-capacity extruder and a precision clamping system for accurate mold closure.

Product Overview

Industrial Blow Molding Efficiency

The PTB200 Blow Moulding Machine is a robust and efficient solution for producing plastic containers and hollow products. Featuring a high-capacity extruder for consistent material processing and a precision clamping system, it ensures accurate mold closure for high-quality production. The machine includes an advanced control system for precise parameter adjustments, making it an ideal choice for manufacturing bottles, drums, and industrial containers.

Performance

Production Output

25 pcs/h

Output Speed

Technical Details

Max Container Volume	220 L
Applicable Product Types	Double L Ring Bottles, Industrial Drums, Hollow Plastic Containers

Features

Key Machine Features

- High-capacity extruder
- Precision clamping system
- Advanced automated control system
- Modular design for flexible configuration
- Easy maintenance access
