Product Overview

Professional Edge Protection

This high-quality plastic corner protector is engineered to safeguard cargo edges and strapping during transit, storage, and handling. Its durable construction features a slotted design that ensures secure strap placement, preventing load shifting and reducing strap abrasion. Ideal for palletized goods and furniture, this solution helps maintain product integrity and minimizes the risk of damage throughout the logistics chain.

Technical Standards

Certifications & Compliance

CE, TÜV Rheinland, Geprüfte Sicherheit

Design Features

Key Design Attributes

- Slotted design for secure strapping
- Rounded edges to reduce friction
- Durable plastic construction
- Prevents strap abrasion
- Prevents load shifting

Application

Recommended Applications

Palletized Goods • Furniture Protection • Webbing Systems • Tie-Down Systems
