

Plastic Crushing Machine

The Plastic Crushing Machine efficiently reduces the size of various plastic materials. Designed for industrial applications, it features a high-torque motor and durable cutting blades for consistent and reliable performance.

Product Overview

Industrial Plastic Crushing Solution

This plastic crushing machine is a robust and efficient solution designed for the size reduction of various plastic materials. Engineered for industrial performance, it features a high-torque motor and durable cutting blades to ensure reliable processing of plastic scraps and rejected parts. The machine is built for compact installation and ease of maintenance, making it an essential component for modern recycling and material recovery workflows.

Technical Specifications

Electric Power

7.5 KW

Rated Power

Net Weight

0.4 T

Overall Dimensions

600 x 600 x 1450 mm

Compliance

Technical Standard

Q/ZDSJ101-2005
