

Plastic Extrusion Die Head

High-precision plastic extrusion die head designed for plastic machinery. It features multiple extrusion points, robust construction, and precise alignment for consistent plastic product manufacturing.

Overview

High-Precision Extrusion Die Head

This high-precision plastic extrusion die head is engineered for consistent and reliable plastic product manufacturing. Built for high-volume production environments, it features robust construction and precise alignment capabilities to ensure uniformity. The unit is highly versatile, offering compatibility with a wide range of plastic materials and is ideal for integration into pipe, profile, and sheet extrusion lines.

Technical Specifications

Construction

Robust • High-Precision
