

Plastic Film and Bag Production Line

This automated line efficiently produces plastic film and bags. It integrates extrusion, cooling, slitting, winding, sealing, and cutting modules for high-volume output.

Overview

High-Efficiency Production Line

This comprehensive plastic film and bag production line is engineered for high-volume manufacturing environments. The system integrates multiple critical stages, including extrusion, cooling, slitting, and final bag sealing, into a unified workflow. Designed for industrial reliability, it features centralized control panels that allow operators to manage and optimize the entire production process with precision.

System Components

Key Modules

- Extruder unit
- Cooling tower
- Slitting and winding unit
- Bag-making unit
- Centralized control panels

Application

Plastic Film Manufacturing, Bag Production, High-Volume Industrial
