

Plastic Film Bag Production Machine

This film bag making machine produces plastic bags from film rolls. It features precise cutting and sealing mechanisms, along with an automated film feeding system.

Product Overview

High-Efficiency Bag Production

This film bag making machine is engineered for the precise production of plastic bags directly from film rolls. It integrates a robust frame with an automated film feeding system to ensure consistent throughput. With adjustable controls for bag dimensions and sealing temperature, this unit offers the versatility needed for manufacturing flat bags, T-shirt bags, and garbage bags efficiently.

Technical Capabilities

Automation Features

- Automated film feeding system
- Precise cutting mechanism
- Precise sealing mechanism

Compatible Bag Types

Flat Bags, T-Shirt Bags, Garbage Bags

Control & Safety

Adjustable Parameters

Bag Length • Bag Width • Sealing Temperature

Safety Features

Yes
