

Plastic Film Blowing Machine

This high-performance plastic film blowing machine is designed for efficient plastic film production. It features a robust frame, multiple film outputs, and an advanced control panel for precise operation.

Overview

High-Performance Film Production

This high-performance plastic film blowing machine is engineered for the efficient and continuous production of diverse plastic films and packaging materials. Featuring a robust construction, it integrates advanced control systems for precise operation, including variable speed control and adjustable film thickness. Designed for versatility, the system is compatible with various plastic resins, ensuring reliable output for demanding manufacturing environments.

Technical Capabilities

Key Performance Metrics

1 Multiple

Film Output Capacity

Operational Features

- Adjustable film thickness
- Variable speed control
- Continuous operation capability
- Advanced control panel interface

Safety & Construction

Safety Features

Integrated Safety Systems • Continuous Operation Ready

Frame Construction

Robust heavy-duty frame

Compatibility

Resin Compatibility

Various Plastic Resins
