

Plastic Frame Mould with Rectangular and Circular Openings

This mould is designed to produce plastic frames. It features both a rectangular and a circular opening, along with mounting points for assembly.

Product Overview

Precision Plastic Frame Mould

This versatile plastic frame mould is engineered for industrial assembly and component housing applications. It features a robust design with integrated mounting points and structural supports to ensure stability during use. With its dual-opening configuration, including both rectangular and circular cutouts, it provides flexibility for various manufacturing workflows.

Physical Characteristics

Color

White

Material

Industrial-grade Plastic

Design Features

Rectangular Opening, Circular Opening, Integrated Mounting Points, Structural Supports
