

Plastic Injection Mold for Chairs and Tables

Plastic injection molds designed for manufacturing tables and chairs. The molds facilitate the creation of diverse furniture designs suitable for mass production.

Product Overview

Professional Grade Furniture Injection Molds

This collection of high-precision plastic injection molds is engineered for the mass production of durable plastic furniture, including chairs and tables. Designed to support various configurations, the set includes specialized tooling for both round and square table tops, as well as distinct chair designs. These molds ensure consistent quality and structural integrity for high-volume manufacturing environments.

Manufacturing Capabilities

Available Mold Configurations

Mold Type	Reference ID
Round Table Mold	365
Square Table Mold	364
Round Table Mold	363
Round Table Mold	362
Round Table Mold	361
Square Table Mold	360

Compatible Furniture Types

Round Tables, Square Tables, Chairs

Application

Production Suitability

Mass Production • Plastic Furniture • Industrial Use
