

Plastic Injection Molding Machine

This plastic injection molding machine is designed for efficient and precise manufacturing. It features a robust clamping unit, advanced hydraulics, and a user-friendly interface for optimal control and repeatability.

Overview

High-Performance Injection Molding

This high-performance plastic injection molding machine is engineered for the efficient and precise manufacturing of complex plastic components. It integrates a robust clamping unit with an advanced hydraulic system to ensure superior process control and high repeatability. Designed for versatility, the machine is compatible with a wide range of thermoplastic materials, making it an ideal solution for diverse industrial applications.

Technical Specifications

Material Compatibility

- Thermoplastic Materials
- General Plastic Parts Manufacturing

Model Identifier	BL130CM
Key Features	High-Performance, Robust Clamping Unit, Advanced Hydraulics, User-Friendly Interface
