

Plastic Injection Molding Machine

This high-performance plastic injection molding machine is designed for efficient and precise manufacturing. It is ideal for producing a wide range of plastic products with consistent quality and high throughput.

Overview

High-Performance Injection Molding

This plastic injection molding machine is engineered for high-precision manufacturing, delivering consistent quality and reliability for diverse plastic part production. It features a robust clamping unit and an advanced hydraulic system designed to optimize throughput and operational efficiency. The integrated user-friendly control interface allows for streamlined operation, making it an ideal solution for modern manufacturing facilities seeking productivity and durability.

Technical Specifications

Model Number	CSD-280W-D
Machine Type	Plastic Injection Molding Machine

Key Performance Metrics

Performance Highlights

280 Tons
Clamping Force

Features

System Features

- Robust clamping unit
- Advanced hydraulic system
- User-friendly control interface
- High-throughput design

Compliance

Certifications	Industrial Grade, High Efficiency
