

Plastic Injection Molding Machine

This injection molding machine is designed for precision plastic part manufacturing. It features a robust clamping unit, advanced hydraulic system, and user-friendly control interface for optimal efficiency and consistent product quality.

Overview

High-Performance Injection Molding

This high-performance injection molding machine is engineered for precision plastic part manufacturing. It features a robust clamping unit and an advanced hydraulic system, ensuring consistent product quality and operational efficiency. Designed for high-volume production, it is ideal for creating intricate designs across a variety of industrial applications.

Technical Specifications

Ideal Applications

- High-volume production
- Intricate plastic part manufacturing
- Precision engineering

Model Identifier	YJT 7500
Key Features	High-Precision, Robust Clamping, Advanced Hydraulics, User-Friendly Interface

Performance Metrics

Performance Highlights

7500 kN

Clamping Force
