

Plastic Injection Molding Machine

This high-performance injection molding machine is designed for efficient and precise plastic part manufacturing. The machine features a high clamping force, advanced control system, and optimized injection unit for superior molding capabilities.

Overview

High-Performance Injection Molding

This high-performance injection molding machine is engineered for efficient and precise plastic part manufacturing. It features a robust design with high clamping force and an advanced control system for superior molding capabilities. Designed for versatility, this machine ensures consistent quality and high output across a wide range of plastic materials and applications.

Key Performance Metrics

Clamping Force

16000 kN

Clamping Force

Model Identifier

VJW 16000

Operational Features

Control System

Advanced Control • User-Friendly Interface

Efficiency

Energy-Efficient Design, Reduced Operational Costs

Capabilities

Application Suitability

- Precision plastic part manufacturing
- High-volume production
- Diverse plastic material processing
