

Plastic Injection Molding Machine

This injection molding machine is designed for precision plastic part manufacturing. It features a robust clamping unit, advanced screw design and a user-friendly control system.

Overview

High-Performance Injection Molding Solution

This high-performance injection molding machine is engineered for precision manufacturing of plastic parts. Featuring a robust clamping unit and an advanced screw design, it ensures optimal plasticizing and consistent quality across high-throughput production runs. The system includes a user-friendly control interface and is designed to integrate seamlessly with automation systems for enhanced operational efficiency.

Key Metrics

Performance Highlights

240 Tons

Clamping Force

Model

CSD/240P

Features

Design Features

- Robust clamping unit
- Advanced screw design
- User-friendly control system

System Capabilities

Precision Manufacturing, High Throughput, Automation Ready, Optimal Plasticizing
