

Plastic Injection Molding Machine

This injection molding machine is designed for high-precision plastic part manufacturing. It features a robust hydraulic system and a user-friendly interface for easy operation.

Overview

High-Precision Injection Molding

The YJFS1600 series injection molding machine is engineered for high-precision manufacturing of plastic parts. It incorporates a robust hydraulic system and an advanced control interface, ensuring consistent performance and ease of operation. Designed with energy efficiency in mind, this machine is suitable for a wide variety of thermoplastic materials and industrial applications.

Technical Metrics

Clamping Force

1600 kN

Clamping Force

Injection Volume	0 cm ³
Tie Bar Spacing	0 mm

Features

Key Features

- Robust hydraulic system
- Advanced control system
- Energy-efficient design
- User-friendly operation interface

Material Compatibility	Thermoplastics
