

Plastic Injection Molding Machine

This plastic injection molding machine is designed for precision manufacturing. It features a robust hydraulic system and an advanced control panel.

Overview

High-Performance Injection Molding

This high-performance plastic injection molding machine is engineered for precision manufacturing applications. It features a robust hydraulic system and an advanced control panel with a digital display, ensuring consistent operation. Designed to handle a wide range of plastic materials, it provides precise control over injection speed, pressure, and temperature for optimal part quality.

Key Metrics

Machine Type

Plastic Injection Molding

Model Identifier

UN30SH

Features

Core Features

- Robust hydraulic system
- Advanced control panel with digital display
- Efficient material feeding system
- Precise injection speed control
- Precise pressure control
- Precise temperature control

Application

Application Suitability

Precision Manufacturing, Multi-Material Compatible
