

Plastic Injection Molding Machine

This high-performance injection molding machine is designed for efficient and precise plastic part production. The series offers robust construction, advanced control systems, and optimized hydraulic components for reliable operation and consistent results.

Overview

High-Performance Injection Molding

The YJK2500 series is a high-performance injection molding machine engineered for efficient and precise plastic part production. It features robust construction, advanced control systems, and optimized hydraulic components to ensure reliable operation and consistent output. Designed for versatility, this machine is ideal for demanding applications across the automotive, electronics, packaging, and consumer goods sectors.

Technical Specifications

Model Series	YJK2500
--------------	---------

Key Features

Core Capabilities

- High-speed injection unit
- Precise mold clamping system
- Advanced control system
- Optimized hydraulic components

Applications

Suitable Industries	Automotive, Electronics, Packaging, Consumer Goods
---------------------	--

User Experience

Interface

User-friendly interface • Easy programming • Real-time monitoring
