

Plastic Injection Molding Machine

This high-performance plastic injection molding machine is designed for efficient and precise manufacturing. It features a robust clamping unit, advanced control system, and optimized injection unit for consistent, high-quality production.

Overview

High-Performance Injection Molding

This high-performance plastic injection molding machine is engineered for the efficient and precise manufacturing of complex plastic parts. It features a robust clamping unit and an advanced control system designed to ensure consistent, high-quality production output. With an optimized injection unit, this machine is ideal for diverse applications within the modern plastics industry.

Technical Specifications

Drive System

Servo Hydraulic

Model

ZL160eM

Clamping Force

160 ton

Control System

C650

Key Features

System Highlights

- Robust clamping unit construction
- Advanced integrated control system
- Optimized injection unit for consistency
- High-precision manufacturing capabilities
