

# Plastic Injection Molds for Children's Products

These injection molds are designed for manufacturing plastic components used in children's products. The molds are engineered to produce durable and safe parts such as seats, toys, and accessories.

## Product Overview

### Precision Injection Molds for Child-Safe Products

These high-precision plastic injection molds are engineered specifically for the mass production of durable, safe, and high-quality components for children's products. Designed for reliability, they support the manufacturing of various plastic parts including garden house components, seats, toys, and custom accessories. Each mold is built to meet the rigorous demands of high-volume production environments while ensuring consistent output quality.

## Technical Specifications

### Available Mold Configurations

- Kids garden house mould\_396
- Kids garden house mould\_395
- Child Parts mould\_270
- Child Parts mould\_269
- Child Parts mould\_268
- Child Parts mould\_267

### Primary Applications

Children's Furniture, Playground Equipment, Plastic Toys, Child Accessories

## Quality & Standards

### Production Suitability

Mass Production Ready • High Durability • Precision Engineered
