

Plastic Injection Mould Component

This is a durable plastic injection mould component. It features mounting points and structural elements for integration within a larger assembly, suitable for machinery or appliances.

Product Overview

Precision Injection Moulded Component

This high-quality plastic injection moulded component is engineered for industrial applications, serving as a functional front panel or housing. Designed with structural integrity in mind, it features integrated mounting points and ridges to ensure seamless integration into larger machinery or appliance assemblies. Its rigid construction offers durability and reliability for demanding operational environments.

Physical Properties

Application Type

Machinery Housing • Appliance Component • Industrial Assembly

Material

Rigid Injection-Molded Plastic

Design Features

Rectangular Opening, Circular Opening, Integrated Mounting Points, Structural Ridges
