

Plastic Leaf Rake with Tines

This plastic rake is designed for gathering leaves, hay and other agricultural materials. Its durable plastic construction makes it lightweight and resistant to rust and corrosion.

Product Overview

Professional Grade Plastic Rake

This durable plastic leaf rake is engineered for efficiency in gathering leaves, hay, and other agricultural debris. Featuring a wide head design with multiple tines, it offers excellent coverage for garden and farm maintenance tasks. Its lightweight construction ensures ease of use during extended periods while providing superior resistance to rust and corrosion compared to metal alternatives.

Key Features

Applications

Gardening • Farming • Landscaping
