

Plastic Machinery Intake Manifold

This intake manifold is designed for plastic machinery applications. Constructed from durable, heat-resistant plastic, this manifold ensures optimal airflow and efficient fuel delivery.

Product Overview

High-Performance Intake Manifold

This high-performance intake manifold is specifically engineered for plastic machinery applications, ensuring optimal airflow and efficient fuel delivery. Constructed from durable, heat-resistant plastic materials, it is built to withstand demanding industrial environments. It features precision-engineered runners for enhanced engine performance and a robust mounting flange for secure, reliable installation.

Technical Details

Material Composition	Heat-resistant industrial plastic
Compatible Equipment	Plastic Processing Machinery, Industrial Engines
Reference ID	29641222

Key Features

Engineering Highlights

- Precision-engineered runners for optimized airflow
- Durable, heat-resistant construction
- Robust mounting flange for secure installation
