

Plastic Pipe Manufacturing Machinery

Machinery designed for the production of plastic pipes. It is used to manufacture PVC and other plastic pipes of varying diameters.

Product Overview

High-Efficiency Pipe Production Solution

This advanced manufacturing machinery is designed for the high-precision extrusion and processing of various plastic pipe types. Capable of handling diverse diameters and materials, the system ensures consistent quality for brown PVC, gray PVC, and heavy-duty black piping. It is an ideal solution for industrial facilities seeking reliable, scalable production capabilities.

Technical Capabilities

Core Processing Functions

- Extrusion
- Cutting
- Shaping

Supported Pipe Materials

PVC (Brown), PVC (Gray), Black Plastic

Performance Metrics

Production Highlights

1 Multi-type

Production Versatility
