

Plastic Pipe Winding Machine

This machine automates the coiling and packaging of plastic pipes. It efficiently handles and stores various sizes and colors of plastic pipes.

Overview

High-Efficiency Pipe Winding Solution

This plastic pipe winding machine is engineered to automate the coiling and packaging process for various plastic piping systems. Designed for industrial efficiency, it streamlines handling and storage by producing uniform, compact coils. The system supports a wide range of pipe sizes and material types, making it a versatile addition to any plastic extrusion or piping production line.

Key Features

Automation Level

Automated Coiling • Packaging Ready • Industrial Grade

Compatible Pipe Types

Plastic Pipes, Multi-color Piping, Various Diameters

Operational Metrics

Primary Function

Coiling and packaging of plastic pipes

Key Operational Benefit

Optimized for efficient handling and storage
