

Plastic Production Line

This plastic production line is engineered for efficient plastic production. It integrates extruders, cooling systems, control panels, and material handling equipment.

Overview

High-Efficiency Plastic Manufacturing Line

This industrial-grade plastic production line is engineered for high-volume manufacturing environments. It integrates advanced extrusion, cooling, and automated material handling systems to ensure consistent output quality and operational efficiency. Designed for versatility, this line supports various plastic processing applications, making it a reliable solution for modern industrial production facilities.

System Components

Integrated Components

- Industrial Extruder Unit
- Advanced Cooling System
- Centralized Control Panel
- Automated Material Handling Equipment

Process Flow Mapping

Stage	Description
Material Input	Automated feeding and handling
Extrusion	Primary plastic shaping and processing
Cooling	Temperature regulation and solidification
Control	Centralized monitoring and management

Operational Metrics

Rated Capacity

1000 kg/h

Production Output
