

Plastic Resin Hopper Dryer

This dryer is suitable for various plastic granules, including PET, PP, and PE. It reduces raw material humidity to under 1%.

Overview

Industrial Plastic Resin Hopper Dryer

This industrial hopper dryer is engineered for the efficient removal of moisture from plastic resin pellets, ensuring optimal material quality before extrusion or injection molding. Designed for consistent material flow and uniform drying, it features a robust construction suitable for demanding manufacturing environments. With precise temperature control and reliable components, it helps prevent processing defects and enhances overall production efficiency.

Technical Specifications

Material Loading Capacity	25 kg
Heating Power	3 kw
Blower Power	90 kw

Physical Dimensions

Unit Weight	40 kg
Dimensions (L*W*H)	400 x 750 x 950 mm

Components

Electrical Components

Component	Origin
Contactator	France
Thermal Overload Relay	France
Temperature Controller	China
