

# Plate and Sheet Metal Drill Bit Grinder

This compact machine is designed for grinding sheet metal and stepped drill bits. It is accurate, rapid, and easy to operate, even without professional skills.

## Product Overview

Compact design optimized for workshop portability and efficient sharpening.

## Professional Grade Drill Bit Grinder

This compact grinding device is engineered for precision sharpening of plate and sheet metal drill bits, including stepped drill designs. It offers a rapid and accurate solution for maintaining tool performance without requiring advanced specialized skills from the operator. Featuring a durable diamond grinding wheel, this machine ensures consistent results for demanding industrial or workshop applications.

## Technical Specifications

Designed for versatile application across various drill bit types.

### Electrical Requirements

- Voltage: 220V
- Frequency: 50HZ

Model	PG-13Q
Capacity Range	14 - 114
Angle Range	110° - 140°

## Performance Metrics

### Speed

**5300 RPM**

Rotation Speed

## Physical Dimensions

Net Weight

14 KG

Dimensions

32 x 23 x 24 cm

## Features

Product Highlights

Diamond Grinding Wheel, Compact Design, Easy Operation, CE Certified

## Included Equipment

Standard Model

Standard package includes essential collets and fixture group for precision grinding.

### Standard Equipment

- Diamond Grinding Wheel (HSS)
- 11 Collets
- Fixture Group
