

Plate Making and Printing Machine

This plate making and printing machine is designed for efficient and precise plate creation and printing processes. It features multiple adjustable lamps for optimal illumination during plate exposure and inspection.

Overview

Precision Plate Making and Printing Solution

This professional-grade plate making and printing machine is engineered for high-efficiency plate creation and precise printing processes. It features an advanced illumination system with multiple adjustable lamps, ensuring optimal exposure and inspection quality. Mounted on a stable, mobile stand with casters, the unit offers excellent maneuverability for dynamic printing environments, while the integrated control panel provides granular adjustment of exposure times and operational parameters.

Technical Features

Illumination System	Multiple Adjustable Lamps, Optimized Exposure, Precision Inspection
Mobility	Yes
Control Interface	Adjustable exposure time and parameter controls

Application

Ideal For

- Professional printing environments
- High-quality plate production
- Precision printing tasks
