Overview

Versatile Platform Dolly

This multi-purpose platform dolly is designed for efficient transport, turnover, and movement of goods in warehouses, workshops, and home environments. Constructed from a 13-layer high-pressure solid board, it offers exceptional durability and a wear-resistant surface. Its compact design features arc-shaped safety corners and smooth-rolling casters, making it a reliable solution for heavy-duty material handling.

Performance

Maximum Load Capacity

200 KG

Load Capacity

Construction

Board Construction	13-layer high-pressure solid board
Board Thickness	18 mm
