

Pliers Hand Tool with Long Handles

This hand tool features a robust construction with elongated handles converging to a central head. The head is designed for gripping or cutting, making it suitable for various manual tasks requiring precision and strength.

Product Overview

Professional Grade Pliers

This robust hand tool is engineered for demanding manual tasks that require both precision and significant force. Featuring elongated handles, the design maximizes leverage, allowing users to apply greater pressure with less effort. The dark, hardened finish ensures durability and protection against wear, making it a reliable choice for gripping or cutting applications in various professional environments.

Design & Construction

Surface Finish

Dark Protective Coating • Hardened Material

Tool Type

Pliers / Pincers

Handle Configuration

Elongated for high leverage

Primary Applications

Gripping, Cutting, Manual Assembly
