

Plumbing and Irrigation Hand Tool Set

This set of hand tools is designed for various plumbing and irrigation applications. It includes valves and nozzles for diverse uses.

Product Overview

Versatile Plumbing & Irrigation Solution

This comprehensive set features a wide range of high-quality valves and nozzles designed for diverse plumbing and irrigation applications. From forging brass angle valves to specialized lawn nozzles, each component is engineered for durability and reliable fluid control. This collection provides professional installers and maintenance teams with the essential hardware needed for both residential and commercial piping systems.

Technical Specifications

Included Components

Model	Component Type
HL-8217	Forging brass angle valve
HL-8218	Forging brass angle valve
HL-8219	Al plastic pipe ball valve
HL-8220	Double hermetic ball valve
HL-8221	Within whorl ball valve
HL-8222	Forging brass gate valve
HL-8223	Forging brass stop valve
HL-8224	Papilionaceous Al plastic pipe valve
HL-8225	Lawn nozzle

Primary Applications

- Plumbing systems
- Irrigation control
- Fluid regulation
- Pipe connection management

Material Composition

Forging Brass, Aluminum Plastic
