Product Overview

Heavy-Duty Plummer Block Housing

This heavy-duty plummer block housing is engineered for robust industrial applications, providing secure mounting and reliable support for bearings. Its split design facilitates straightforward installation and maintenance, ensuring the smooth operation and extended lifespan of rotating machinery. Constructed from high-quality materials, this housing offers exceptional durability and resistance to wear and tear in diverse industrial environments.

Design & Construction

Design Type	Split design
Key Features	Heavy-duty, Wear-resistant, Industrial grade
Maintenance	Easy access for installation and maintenance

Technical Specifications

Assembly Components

- Orange-painted housing
- Cylindrical roller with longitudinal splines
- Silver-wrapped cylindrical drum
- Lifting eyes
- Steel base
- Connection bolts
