

Plunge Router with Variable Speed Motor

This plunge router features adjustable depth control and a precision guide system. The variable speed motor ensures optimal performance in various materials, making it ideal for woodworking and routing applications.

Product Overview

Professional Plunge Router

This high-performance plunge router is designed for precision woodworking and complex routing tasks. Featuring a powerful variable speed motor, it allows for optimal material removal rates across a variety of wood types. The integrated adjustable depth control and precision guide system ensure consistent, professional-grade results for every project.

Technical Specifications

Model ID	CYZD-KZ-12A
Motor Type	Variable Speed

Features

Ideal Applications

- Woodworking
- Routing Applications
- Precision Joinery

Key Features	Adjustable Depth Control, Precision Guide System, Ergonomic Design, Variable Speed
