

# PN16 Flanged Gate Valve with WCB Body

This PN16 gate valve features a WCB (Weldable Cast Carbon Steel) body, ensuring durability and resistance to high-pressure conditions. The flange connection allows for straightforward installation and maintenance in diverse piping systems.

## Overview

### Industrial Grade Gate Valve

This PN16 Flanged Gate Valve is engineered for demanding industrial applications requiring robust flow control. Constructed with a durable WCB (Weldable Cast Carbon Steel) body, this valve offers exceptional resistance to high-pressure environments. Its flanged connection design facilitates straightforward installation and maintenance across diverse piping systems, making it an ideal choice for managing liquids and gases in industrial processes.

## Technical Specifications

### Nominal Pressure

**16 PN**

Pressure Rating

Body Material	WCB (Weldable Cast Carbon Steel)
Connection Type	Flanged
Nominal Diameter	150 DN

## Features

### Key Features

- Durable Cast Steel Construction
- High-Pressure Resistance
- Easy Flanged Installation
- Suitable for Liquid and Gas Applications

Product Tags	Gate Valve, PN16, WCB, Flanged, Cast Steel, Carbon Steel
