Product Overview

Professional Pneumatic Air Duster

This pneumatic air duster gun is an essential tool designed for efficient cleaning in workshops, manufacturing facilities, and industrial environments. It utilizes a high-velocity stream of compressed air to effectively remove dust, debris, and contaminants from hard-to-reach areas and machinery. Built for durability, it features a robust construction with a brass valve and stainless steel spring, ensuring reliable performance during heavy-duty use.

Technical Specifications

Noise Levels

88 dB

Sound Pressure Level

100 dB

Sound Power Level

Maximum Pressure

0.63 MPa

Weight

0.11 kg

Design & Construction

Nozzle Details

Feature	Specification
Nozzle Length	109 mm
Nozzle Inside Diameter	4.0 mm

Key Components

Brass Valve, Brass Insert, Stainless Steel Spring

Features & Compatibility

Key Features

- Controlled air flow
- Hanging facility for easy storage
- Ergonomic handle design
- Includes 1pc European (German) connector
