

Pneumatic Air Hammer with Chisel Set

This pneumatic air hammer is suitable for demolition, cutting, and shaping applications. It features variable speed and comes with a set of interchangeable chisels.

Overview

Versatile Pneumatic Solution

This pneumatic air hammer is a professional-grade tool designed for demolition, metalworking, and automotive repair. It features a durable metal construction paired with an ergonomic grip and variable speed trigger for enhanced precision. The included interchangeable chisel set ensures versatility across various cutting and shaping applications.

Key Performance

Performance Highlights

160 RPM

Stroke Speed

50 ft-lb

Max Torque

10 mm

Chisel Diameter

Technical Specifications

Item Number	LK-30
Max Torque (Metric)	68 N-m
Air Inlet Size	1/4" NPT

Physical Dimensions

Overall Length	175 mm
Net Weight	1.44 KG

Applications

Recommended Applications	Automotive Repair, Metalworking, Construction, Demolition, Cutting, Shaping
--------------------------	---

Features

Design & Build

- Durable metal construction
- Ergonomic grip for comfort
- Variable speed trigger for precise control
- Interchangeable chisel system
