

Pneumatic Air Scissor Cutter

This pneumatic air scissor cutter is designed for precise and efficient cutting applications. It features a compact design with an air pressure of 390N, providing ample power for various cutting tasks.

Product Overview

Professional Pneumatic Air Scissor Cutter

The CT-702 is a high-performance pneumatic air scissor cutter engineered for industrial and manufacturing environments. This compact tool delivers precise and efficient cutting power, ensuring clean results for a variety of demanding applications. Its ergonomic design is specifically crafted to reduce operator fatigue, making it an ideal choice for high-repetition cutting tasks.

Technical Specifications

Dimensions & Weight

103 mm Full Length	130 g Weight	30 mm Diameter
------------------------------	------------------------	--------------------------

Model Number	CT-702
Operational Performance	390 N

Key Features

Key Features	Pneumatic Operation, Compact Design, Ergonomic Grip, Industrial Grade, High Precision
