

# Pneumatic Angle Grinder for Grinding and Polishing

This pneumatic angle grinder is designed for grinding, cutting, and polishing various materials. The tool's compact design and angled head allow easy access to tight spaces.

## Product Overview

### Professional Pneumatic Angle Grinder

This pneumatic angle grinder is a versatile, heavy-duty tool engineered for grinding, cutting, and polishing tasks. Its compact, angled head design ensures excellent maneuverability in confined spaces, while the robust motor provides consistent performance for industrial applications. Designed with operator comfort and safety in mind, it features an ergonomic grip to reduce fatigue and integrated safety mechanisms for secure operation.

## Key Performance Metrics

### Primary Applications

Grinding, Cutting, Polishing, Weld Removal, Surface Preparation, Deburring

## Design & Safety

### Safety Features

- Spindle lock for secure disc changes
- Protective debris guard

### Ergonomics

Yes

## Compatibility

### Accessory Compatibility

Compatible with a wide range of abrasive discs and accessories
