

Pneumatic Bag Sealing Machine

This pneumatic bag sealing machine ensures efficient and secure closure for various bag types. It features a robust stainless steel frame with adjustable height settings and a foot pedal for hands-free operation.

Product Overview

Industrial Pneumatic Bag Sealing Solution

This pneumatic bag closing machine is engineered for the efficient and secure sealing of diverse bag types in industrial environments. Featuring a durable stainless steel construction, the unit provides consistent sealing pressure through an integrated pneumatic cylinder. Designed for high-volume operations, it includes a foot pedal for hands-free control and adjustable height settings to accommodate various workflow requirements.

Technical Specifications

Frame Material	Stainless Steel
Operation Method	Pneumatic
Control Mechanism	Foot Pedal
Adjustability	Adjustable Height

Operational Features

Recommended Use

- Industrial Packaging
- High-volume Bag Sealing
