

Pneumatic Banknote Counter

This pneumatic banknote counter is designed for high-speed and accurate counting. It features advanced sensing technology to ensure reliable performance and minimize errors.

Product Overview

High-Performance Pneumatic Cash Counting

The pneumatic banknote counter is engineered for high-speed, accurate processing of cash in professional environments. Its advanced sensing technology and pneumatic handling system ensure smooth operation while significantly minimizing jams and errors. Designed for reliability, this machine provides essential counterfeit detection capabilities, making it an ideal solution for banks and large-scale financial institutions.

Technical Specifications

Key Performance Indicators

500 CQ

Model Series

Advanced Features

- High-speed pneumatic banknote handling
- Advanced counterfeit detection technology
- Multi-mode counting support
- User-friendly interface
- High-visibility display

Usage & Applications

Operational Efficiency

Anti-Jam Pneumatic System • High Precision • Easy Operation

Ideal Applications

Banking, Financial Institutions, High-Volume Cash Handling
