Product Overview

Professional Brake & Clutch Bleeding Solution

This pneumatic brake bleeder kit is designed for efficient, one-man operation, making it suitable for both home garages and professional automotive workshops. It utilizes standard workshop air supply to flush and refill brake and clutch systems, including those equipped with ABS. The system features a portable, pre-chargeable low-pressure tank, significantly reducing service time for regular brake maintenance.

Technical Specifications

Operating Pressure Range

10 psi

Minimum Pressure

40 psi

Maximum Pressure

Pressure Gauge Units

psi • kgf/cm²

Vehicle Compatibility

European Vehicles, Japanese Vehicles, US Vehicles, ABS Systems

Kit Contents

Package Includes

- 1 x Bleeder tank with pressure gauge
- 1 x Collection bottle
- 1 x Fluid hose with quick connector
- 1 x Comprehensive adaptor kit
