

Pneumatic Button Attaching Machine

This pneumatic button attaching machine is a robust and efficient solution for attaching buttons to various materials. It utilizes pneumatic power for consistent and reliable button fastening, ensuring high productivity and precision.

Overview

Professional Pneumatic Button Attaching Solution

The LS-T2 pneumatic button attaching machine is a robust and efficient solution designed for high-volume button fastening across apparel and textile manufacturing industries. Utilizing pneumatic power, this machine ensures consistent, reliable, and precise attachment on various material types. Its versatile design features adjustable settings for different button sizes and material thicknesses, making it an essential tool for streamlining production workflows.

Technical Specifications

Power Source	Pneumatic
Industry Applications	Apparel, Textile, Manufacturing

Key Features

Performance Metrics

1 High Operational Precision	1 High Ease of Maintenance
--	--------------------------------------

Adjustability

- Adjustable for different button sizes
- Adjustable for various material thicknesses
