

Pneumatic Coil Roofing Nailer

The pneumatic coil roofing nailer is designed for installing asphalt and fiberglass shingles. It features adjustable depth control and a coil magazine for efficient, consistent nail placement.

Overview

Professional Roofing Performance

This pneumatic coil roofing nailer is engineered for high-speed fastening of asphalt and fiberglass shingles. Its lightweight construction is specifically designed to reduce operator fatigue during long shifts on the roof. Featuring adjustable depth control and a high-capacity coil magazine, this tool ensures consistent nail placement and minimizes downtime for reloading.
