

# Pneumatic Compressor for Spraying and Spreading

This compressor is designed for spraying machinery and spreading equipment applications. It features a durable construction with a horizontally mounted air tank and a twin-cylinder pump.

## Product Overview

### Industrial Pneumatic Performance

This high-performance pneumatic compressor is specifically engineered to support spraying machinery and spreading equipment in professional environments. Built with a robust horizontally mounted air tank and a heavy-duty twin-cylinder pump, it ensures consistent airflow and durability under load. Designed for high mobility, the unit features integrated wheels and a handle, making it an ideal choice for operations requiring frequent tool repositioning.

## Technical Specifications

Pump Type	Twin-cylinder
Mounting Style	Horizontal air tank

## Safety and Control

### Included Components

- Pressure regulator
- Pressure gauge
- Safety valve

## Features

Mobility	Portable, Integrated handle, Wheeled base
----------	---

## Applications

### Suitable Applications

Spraying Machinery • Spreading Equipment • Pneumatic Tools
