

Pneumatic Connector Mounting Bracket

Galvanized steel mounting brackets are designed for securing pneumatic connectors. They feature a multi-hole base for versatile mounting options and a raised, angled connector cradle for optimal positioning.

Product Overview

Professional Mounting Solution

These galvanized steel mounting brackets are engineered specifically for securing pneumatic B3 connectors. The design features a multi-hole base for versatile mounting options, ensuring easy installation in various configurations. With a raised, angled connector cradle, this bracket provides optimal positioning and durability, offering excellent corrosion resistance for industrial environments.

Technical Details

Compatible Connector Type

Pneumatic B3 Connectors

Key Features

- Multi-hole base for versatile mounting
- Raised, angled connector cradle
- Corrosion-resistant finish

Material

Galvanized Steel
