

Pneumatic Container Capping Machine

This pneumatic capping machine applies caps to containers. It features adjustable torque for secure sealing and is constructed for reliable performance.

Overview

Industrial Pneumatic Capping Solution

This pneumatic container capping machine is engineered for high-performance industrial sealing applications. It features adjustable torque settings to guarantee consistent, secure closures while preventing damage from over-tightening. Designed for versatility, it accommodates a wide range of cap sizes and container types, making it an essential tool for efficient production lines.

Technical Specifications

Construction

Industrial Grade • Durable Materials

| | |
|------------------|----------------------------|
| Operation Method | Pneumatic (Compressed Air) |
| Torque Control | Yes |

Integration

Mounting Features

- Suspension loop included
- Production line compatible
