Overview

High-Performance Cutting Tool

This pneumatic cut-off tool is engineered for precision cutting across metal, plastic, and composite materials. It features a compact 75mm disc design, making it an ideal choice for automotive repair, fabrication, and general industrial applications. With its ergonomic build and safety-focused features, it provides reliable performance while helping to reduce operator fatigue during extended use.

Technical Specifications

Rated Speed

18000 min-1
Speed

Operating Air Pressure	6 bar
Air Consumption	480 L/min
Tool Weight	0.69 kg
Overall Length	7-1/2 inches

Connectivity & Compatibility

Air Inlet Size	1/4 inch
Recommended Hose Size	3/8 inch

Features & Compliance

Key Features

- 75mm cutting disc
- Adjustable safety guard
- Lightweight composite housing
- Ergonomic design

Compliance & Standards

CE, EN62841-3-9
