

Pneumatic Die Grinder 25000 RPM

This die grinder features a maximum outer diameter of 25mm and a no-load speed of 25000r/min. It is designed for various grinding and polishing applications.

Overview

High-Performance Pneumatic Die Grinder

This pneumatic die grinder is engineered for precision grinding and polishing tasks in demanding industrial environments. Featuring a robust design with a no-load speed of 25,000 RPM, it delivers consistent power for detailed metalwork. Its compact form factor, with a maximum outer diameter of 25mm, allows for excellent maneuverability in tight spaces.
