

Pneumatic Horizontal Drilling Unit

This pneumatic horizontal drilling unit is designed for automated drilling applications. It features an integrated air motor, adjustable feed rate, and a compact design for easy integration into automated systems.

Product Overview

Professional Horizontal Drilling Solution

The Pneumatic Horizontal Drilling Unit is a high-performance tool engineered for automated industrial drilling applications. It features an integrated air motor and an adjustable feed rate to ensure precision across a variety of materials. Its compact design allows for seamless integration into existing automated assembly or manufacturing systems.

Technical Features

Control Options

- Adjustable feed rate
- Automated drilling compatibility

Drive System

Pneumatic Air Motor

Key Applications

Automated Drilling, Industrial Use, High-speed Drilling

Design Specifications

Form Factor

Compact
